

BECAUSE YOUR BUSINESS RUNS THROUGH US

Introducing TekLok:

The easiest and most convenient way to install multi-cable bundles.

Berk-Tek[®]
A NEXANS COMPANY

www.berktek.com

How does TekLok stack up to the competition?

TekLok's unique packaging is revolutionizing cable installations around the world. Unlike competitor installation requirements, TekLok eliminates the need for special tools, deployment devices, and additional manpower to hold the boxes during the pulling process, effectively speeding up installation and reducing overall project costs.

The easy-to-use, interlocking tabs allow for quick and convenient assembly of stacks of cable boxes*. Each stack is grouped and locked together using top-side tabs to form a fortified wall of cable boxes. It's fast. It's convenient. It's easy. And most importantly, it's stable.

**For your safety, Berk-Tek recommends that each cable stack be no more than 4 boxes high*

TEKLOK BENEFITS

- ▶ Fast, Easy, Convenient, and Stable
- ▶ Easy to assemble with no special tools required
- ▶ Quicker installation allows for reduced project costs
- ▶ Unique, environmentally-friendly design offers less packaging waste

TEKLOK AVAILABILITY
